Airtel Announces Agreement with SpaceX to Bring Starlink's High-Speed Internet to its Customers in India

Agreement Explores Future Collaborative Opportunities with Starlink in India

New Delhi, March 11, 2025: Airtel announced today an agreement with SpaceX to bring Starlink's high-speed internet services to its customers in India. This is the first agreement to be signed in India, which is subject to SpaceX receiving its own authorizations to sell Starlink in India. It enables Airtel and SpaceX to further explore how Starlink can complement and expand Airtel's offerings, and how Airtel's expertise in the Indian market complements SpaceX's direct offerings to consumers and businesses.

Airtel and SpaceX will explore offering Starlink equipment in Airtel's retail stores, Starlink services via Airtel to business customers, opportunities to connect communities, schools, and health centers, among many others, in even the most rural parts of India. Airtel and SpaceX will also explore how Starlink could help expand and enhance the Airtel network, as well as SpaceX's ability to utilize and benefit from Airtel's ground network infrastructure and other capabilities in India.

Airtel remains committed to delivering comprehensive and reliable connectivity and digital solutions leveraging advanced technology with a focus on customer-centric services. By adding Starlink, (in addition to its existing alliance with Eutelsat OneWeb) to its offerings, Airtel will further its ability to offer nationwide connectivity and connect previously underserved areas, particularly those with limited to no coverage today. With Starlink enterprise suite, Airtel will be able to offer enterprises, businesses, and communities comprehensive and seamless connectivity packages.

*"Working with SpaceX to offer Starlink to Airtel customers in India is a significant milestone and further demonstrates our commitment to next-generation satellite connectivity," said **Gopal Vittal, Managing Director and Vice Chairman, Bharti Airtel Ltd.** "This collaboration enhances our ability to bring world-class high-speed broadband to even the most remote parts of India, ensuring that every individual, business, and community has reliable internet. Starlink will complement and enhance Airtel's suite of products to ensure reliable and affordable broadband for our Indian customers – wherever they live and work."*

"Technology is always evolving and we're committed to staying at the forefront of innovation so that we can continue to bring the best connectivity experience for our customers. This includes collaborating with global leaders like SpaceX to extend our reach and add new coverage to customers throughout all of India."

*"We are excited to work with Airtel and unlock the transformative impact Starlink can bring to the people of India. We are constantly amazed by the incredible and inspiring things that people, businesses and organizations do when they are connected via Starlink," said **Gwynne Shotwell, President and Chief Operating Officer of SpaceX.** "The team at Airtel has played a pivotal role in India's telecom story, so working with them to complement our direct offering makes great sense for our business."*

About Bharti Airtel Limited:

Headquartered in India, Airtel is a global communications solutions provider with over 550 million customers in 15 countries across India and Africa. The company also has its presence in Bangladesh and Sri Lanka through its associate entities. The company ranks amongst the top three mobile operators globally and its networks cover over two billion people. Airtel is India's largest integrated communications solutions provider and the second largest mobile operator in Africa. Airtel's retail portfolio includes high speed 4G/5G mobile broadband, Airtel Xstream Fiber that promises speeds up to 1 Gbps with convergence across linear and on-demand entertainment, streaming services spanning music and video, digital payments and financial services. For enterprise customers, Airtel offers a gamut of solutions that include secure connectivity, cloud and data centre services, cyber security, IoT, Ad Tech and cloud-based communication. Within our diversified portfolio, we offer passive infrastructure services through our subsidiary Indus Tower Ltd. For more details visit www.airtel.com

About Starlink by SpaceX

Starlink delivers high-speed, low-latency internet to users all over the world. As the world's first and largest satellite constellation using a low Earth orbit, Starlink delivers broadband internet capable of supporting streaming, online gaming, video calls and more. Starlink is engineered and operated by SpaceX. As the world's leading provider of launch services, SpaceX is leveraging its deep experience with both spacecraft and on-orbit operations to deploy the world's most advanced broadband internet system.
